

# RadioRA<sup>®</sup> 2

Save energy with wireless total home control from Lutron

# The benefits of total home control

seeTouch® wall-mounted keypad in stone with personalized engraving

Create lighting scenes to match any mood or activity at the touch of a button.

Total home control is the ability to adjust the amount of daylight and electric light, the temperature, and the power used by appliances in a room, or throughout your home.

## With RadioRA® 2, you can:

- **save energy** and lessen your impact on the environment. The energy-saving benefits of RadioRA 2 are brought to you through a combination of light, shade, temperature, and appliance control.
- **add convenience to your daily life.** With a total home control system, you can adjust lights, shades, and temperature to the specific level you want, in a particular room, or throughout your house—at the touch of a button.
- **create just the right mood or ambiance** for any activity—and do it with stylish products that will complement your home's décor.
- **add cutting edge technology to your home.** With RadioRA 2, you can control lights, shades, temperature, and appliances from wall-mounted, tabletop, or handheld controls, in a specific room—or remotely from another room—or even from outside your home.

## Ideal for existing homes and new construction

Because RadioRA 2 features Lutron wireless technology, the system installs just as easily into existing homes as it does into new construction.

# The basics of energy savings

## Light control

Dimming a standard halogen or incandescent light bulb by 25% saves 20% lighting energy. Dim more and you'll save even more. Sensors and a timeclock also help save energy by turning off lights when they are not needed.

**Potential energy savings: 20%**

## Temperature control

Temperature control is the perfect complement to light and shade control because it provides the ability to adjust heating and cooling systems any time of day—even while away from home, saving up to 16% or more of heating and cooling energy usage.<sup>1</sup>

**Potential energy savings: 16%**

## Appliance control

Many appliances—like computer monitors—consume energy 24 hours a day, accounting for 10% of a typical home's electricity use.<sup>2</sup> Turning off this standby power as part of a total home control system saves energy.

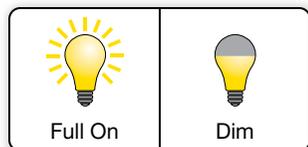

**Potential energy savings: 10%**

---

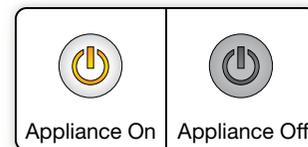

## Shade control

You can make the most of the energy savings you get from light, temperature, and appliance control, by adding motorized shades to a space. Controllable window shades can save on heating and cooling costs by blocking the sun's rays in summer or letting them in to warm a room during colder months.

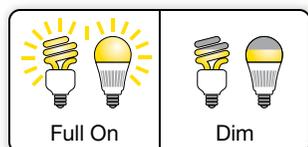

The energy-saving solutions listed below use a combination of light, shade, temperature, and appliance control to capitalize on **energy savings in your home**, without sacrificing comfort or convenience.

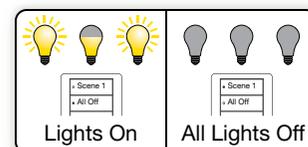

**Dimming** incandescent or halogen bulbs by 25% saves 20% electricity. Dimming more saves even more.

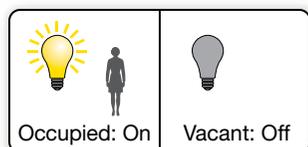

**Appliance control** turns off standby power to electronic appliances when you're not using them.

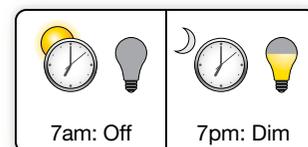

**CFLs and LEDs** already use less energy than standard bulbs, so dimming these highly efficient bulbs saves additional energy.

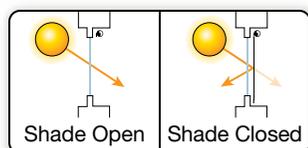

The **"All Off" button** turns all lights off with a single touch.

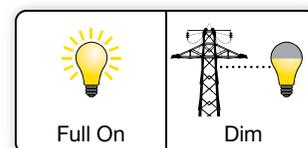

**Occupancy sensing** turns lights and standby power from electronic appliances off when a person leaves the space.

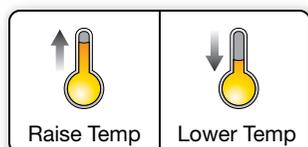

**Scheduling** can dim or turn off lights and standby power from electronic appliances when they're not needed, as well as set back the temperature when not as much heating or cooling is needed.

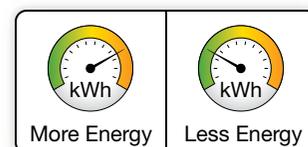

**Controllable window shades** reduce heating costs in winter and cooling costs in summer.

**Demand response** automatically reduces energy use from lights, shades, and heating/cooling systems during peak electricity usage times.

**Temperature control** automatically sets back the temperature when heating or cooling a room, so you use less electricity.

The **"Green" button** reduces energy use from lights, shades, and heating/cooling systems with a single touch.

During your tour through a RadioRA® 2 home, the recommended energy-saving solutions in each room will be indicated by the icons shown above.

# Entry: Warm and welcoming

Control from inside  
or outside your home

Conveniently control and monitor your home's lights, shades, and temperature as you approach your home, from anywhere inside your home, or even while away.

The system's two-way communication lets you know if lights are left on, shades are open, or what the temperature is even when you can't see the areas being controlled.

seeTouch® keypad

iPhone® with Lutron  
Home Control+ app

Turn on your lights from the comfort  
of your car.

Never walk into a dark house again.

Create a path of light from your foyer  
into your house.

# Kitchen: The heart of your home

## Control for versatility

Whole home control adds a new level of versatility to your kitchen by making it easy to create the perfect atmosphere for different activities.

And with temperature control, you can stay comfortable as things heat up—just turn the thermostat down a few degrees right from your seeTemp® wall control.

Bright daylight illuminates work surfaces when preparing meals.

Downlights and insulating honeycomb shades set the mood for entertaining.

Soft lighting and adjusted shades offer relaxation and privacy.

# Media room: Taking it easy

## Control for convenience

RadioRA® 2 brings theater magic to your media room by dimming the lights as the show begins. Proper light levels and glare-eliminating shades create the perfect viewing environment.

### Integration with other systems

RadioRA 2 integrates with a wide variety of universal remote controls, allowing you to control lights, shades, temperature, and audio-visual components all from your favorite remote. We work with other manufacturers to make sure our products integrate reliably. Please see page 14 for a list of our integration partners.

Turn your media room into the ultimate home theater by creating the perfect viewing environment.

Say goodbye to glare with controllable window shades.

# Sunroom: Entertaining friends

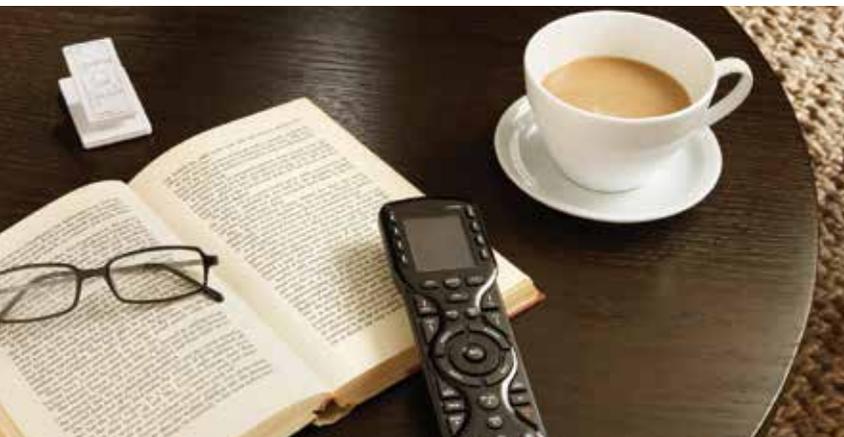

## Control for indoor/outdoor living

Add RadioRA® 2 to a room and you've just increased its flexibility. Adjust lights and shades to create the best setting for reading. When entertaining, soften lights in spaces where guests are relaxing, and raise shades to enjoy the sunset.

You can also conveniently control your ceiling fan with our wall control, which makes it easy to fine-tune the room temperature without the hassle of pull chains.

Pico® wireless control

Adjust lights and shades to create the best setting for reading.

When entertaining, soften lights in spaces where guests are relaxing, and raise shades to enjoy the sunset.

# Master suite: Rooms for relaxing

## Control in your bedroom—and bathroom

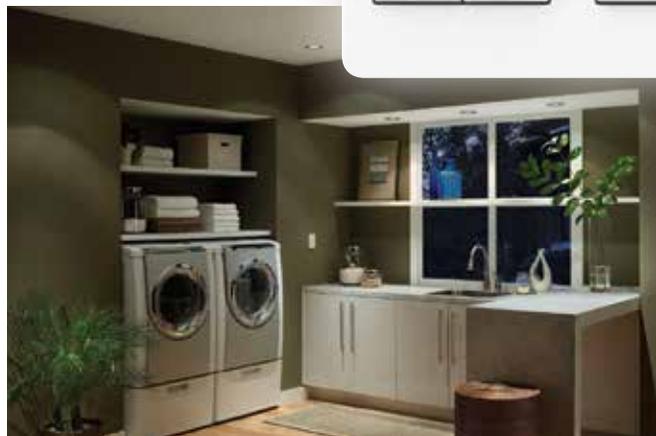

The convenience of whole home control means you can monitor lights, shades, heating, and cooling from anywhere in your home—including the comfort of your bed. You can also set lights and shades in the bathroom to the perfect level for creating a soothing retreat.

seeTouch® tabletop keypad in snow

Set lights and shades in the bathroom to the right level for relaxing.

Turn lights off in rooms you may have forgotten about from the comfort of your bed.

Press a keypad button and wake up to soft light.

## Remote control and monitoring

The Lutron Home Control+ app<sup>1</sup> lets you control and monitor your RadioRA® 2 system right from your mobile device — at home or while away.

Full two-way functionality allows your **iPhone**®<sup>2</sup>, **iPod touch**®<sup>2</sup>, **iPad**®<sup>2</sup>, and **Android**™<sup>3</sup> devices to update in real-time when you adjust lights, ceiling fans, shades, temperature, or plug-in devices in your home. The app supports multiple RadioRA 2 systems — perfect for users with more than one home.

The Level Editor feature offers the ability to easily adjust and save your system's keypad, timeclock, and thermostat programming. On the iPad®, the HomeGlance screen provides an at-a-glance overview of your favorite keypads and devices, as well as thermostats and timeclock mode.

## Remote Access

Now you can have the added convenience of controlling your RadioRA 2 system from anywhere internet access is available. Set up is easy and you don't need a VPN. Simply download the Lutron Home Control+ app, available on the App Store and in the Android™ Market, and speak with your installer to ensure you have the proper software installed to get started.

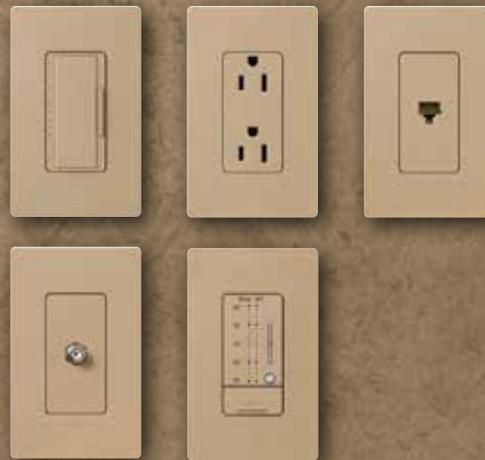

- <sup>1</sup> Apps require set up by a qualified RadioRA 2 dealer. Remote access requires appropriate network equipment and configuration.

## Keypads

Use wall-mounted or tabletop keypads to adjust lights, ceiling fans, shades, or HVAC. Handheld controls and the car visor transmitter are convenient ways to adjust lights and shades. Keypads are available in a wide variety of button configurations and colors.

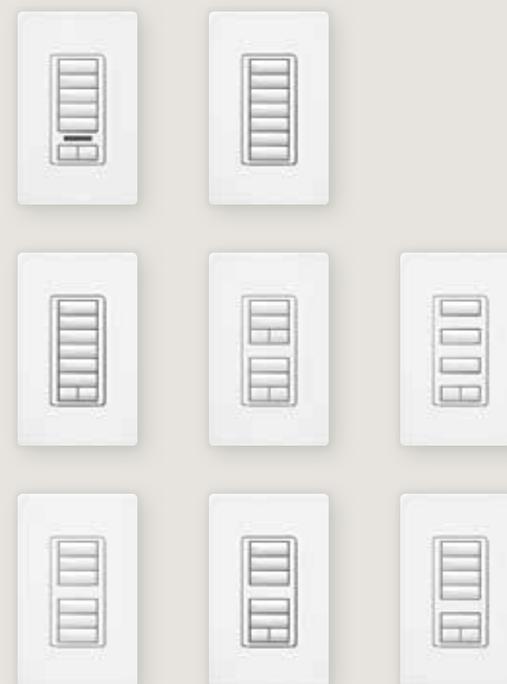

Shown actual size: Five-button keypad with raise/lower

Shown actual size: Three-button keypad with raise/lower

### seeTouch® wall-mounted keypads

install in a standard wallbox to provide control of lights and/or shades individually or in preset scenes. They feature backlit buttons and personalized engraving.

Available button configurations

## Keypads (continued)

**seeTouch® tabletop keypads** are powered by standard AAA batteries or an included plug-in adapter. Tabletop keypads provide convenient, portable control of the system with backlit buttons and personalized engraving.

Shown actual size: Tabletop keypad with 10 scene buttons, as well as on/off and raise/lower buttons

The **car visor transmitter** is a three-button, battery-powered control that provides control of lights and shades from your car. HomeLink® compatibility in the visor control receiver (see page 29) allows your car's built-in buttons to adjust lights and shades.

Shown actual size: Car visor transmitter

# System components

## Keypads (continued)

**Pico® wireless controls** are battery-powered (10-year battery life) remote controls that can be mounted to any wall surface, placed on a pedestal for tabletop use, or used as a handheld control. A wall-mount option provides the convenience of additional “3-way” control of lights and shades with no new wiring.

## Light controls

Light controls provide the basic building blocks for the RadioRA® 2 system. Dimmers, switches, and other components are available in a variety of colors and finishes.

The **wall-mounted hybrid keypad** replaces a standard switch. It receives signals from keypads and sensors and controls power to your lights. With the hybrid keypad you can turn your lights on, off, dim them, or create specific scenes. You can also control other lights throughout your home—as well as shades—using this keypad.

## Light controls (continued)

A **wall-mounted dimmer** installs in place of a standard light switch to provide dimming control of the attached lighting, as well as system control from keypads and other devices.

Shown actual size: Wall-mounted dimmer

A **wall-mounted switch** installs in place of a standard light switch to provide switching control of the attached lighting, as well as system control from keypads, sensors, and other devices.

Shown actual size: Wall-mounted switch

## Light controls (continued)

The **tabletop lamp dimmer** provides direct dimming control of an attached table lamp, and provides system control of the lamp from keypads and other devices. The dimmer's "stack-on" plug connects to a standard electrical receptacle and also provides the connection for the lamp.

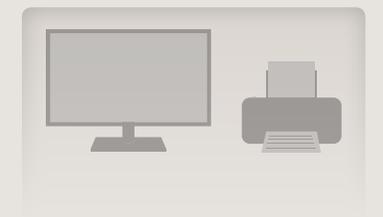

The **plug-in dimming module** plugs into a standard receptacle and provides connection for floor or table lamps. Plug-in modules are designed to be concealed behind furnishings. Connected lights can be controlled only from keypads, sensors, and other system devices.

## Appliance control

Appliance controls save energy by shutting off standby power to electronic appliances such as printers and computer monitors when they're not in use.

The **plug-in appliance module** plugs into a standard receptacle and provides connection for electrical appliances. Plug-in modules are designed to be concealed behind furnishings. The connected appliance can be switched off only from keypads, sensors, and other system devices.

## Fan control

**Fan controls** are a convenient way of controlling ceiling fans without the hassle of pull chains.

The wall-mounted fan control works with ceiling fans up to 2 amps, provides four quiet speeds, and doesn't require any additional wiring.

Shown actual size: Wall-mounted fan control

## Occupancy/vacancy sensors

Sensors provide automated energy savings and added convenience. **Radio Powr Savr™ wireless occupancy/vacancy sensors** are battery powered (10-year battery life) and can be installed without the need for any wiring.

These sensors work with RadioRA® 2 light controls to turn lights on when people enter a room and turn lights off automatically when the room is empty. Available in ceiling, corner, and hallway mount configurations for appropriate sensor coverage in any room.

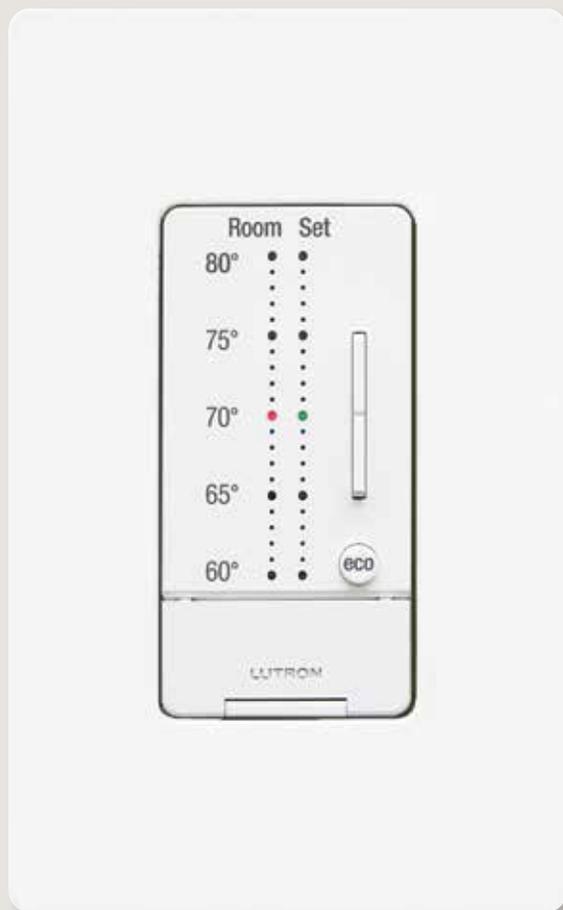

Shown actual size: Radio Powr Savr wireless occupancy/vacancy sensor (ceiling mounted and wall mounted)

# System components

## Temperature controls

Add a Lutron thermostat to your RadioRA® 2 system for convenient temperature control from keypads, mobile devices, and the timeclock.

The **seeTemp**® wall control shows current temperature and allows you to adjust set point and system mode (heating, cooling, auto, fan on/off). Save energy by reducing your HVAC usage with the “eco” button.

Shown actual size: seeTemp wall control

## TouchPRO Wireless® with Clear Connect® RF Technology

The TouchPRO Wireless with Clear Connect RF Technology combines the trusted Honeywell® brand with Lutron innovation. It looks like a conventional thermostat, is easy to install, and it works with Lutron’s designer seeTemp wall-mounted temperature controls—so you can add additional points of control while enhancing décor.
